Accessing Course Evaluations

- You can also access course evaluations through Canvas. Login to Canvas (http://canvas.baylor.edu) using your BearID and password.
- Select "Account" from the menu on the left of the page, then select "Profile". Select "Course Evaluations" from the menu in your profile.

Accessing Course Evaluations

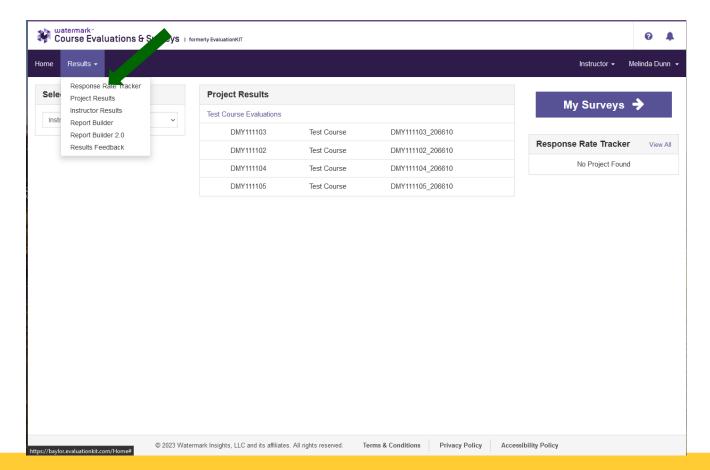

- You are now at the Course Evaluations & Surveys dashboard.
- If you are both an Instructor AND a student, you can change your role by clicking on the drop-down box in the upper right-hand corner. To view evaluation results you must select the *Instructor* role.

Viewing Response Rates

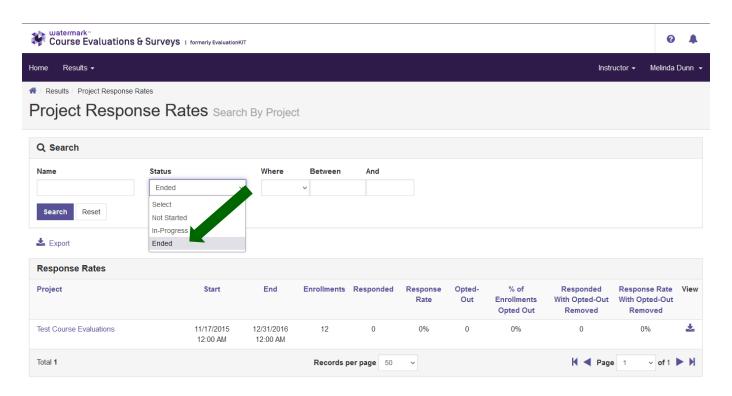

- When evaluations are open, the *Response Rate* Tracker on the right side of the page will show the current average response rate for all courses combined.
- You can view response rates for individual courses by clicking Results > Response
 Rate Tracker from the menu bar. Then select the project name (e.g., Fall 2023
 Course Evaluations) to view response rates for courses in the project.

Viewing Response Rates

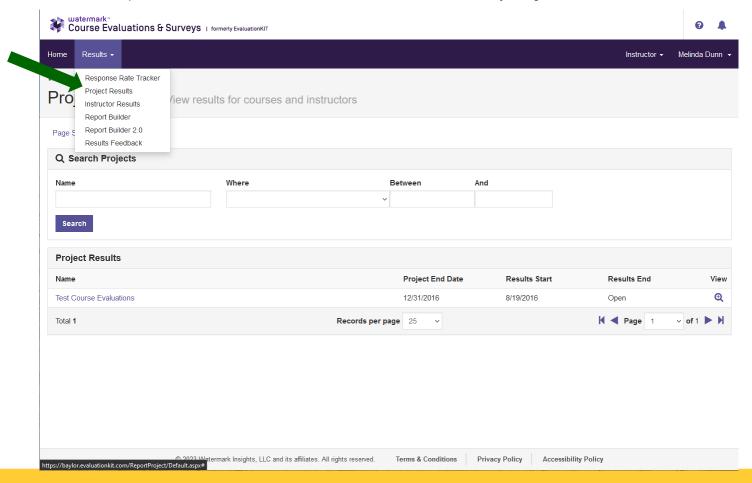

- If the evaluations have ended, change the Status drop-down menu to Ended. You
 can enter the name of the term (e.g., Fall 2023) in the name search box to narrow
 the results.
- Click on the project name to view response rates for individual courses.

Viewing Evaluation Results

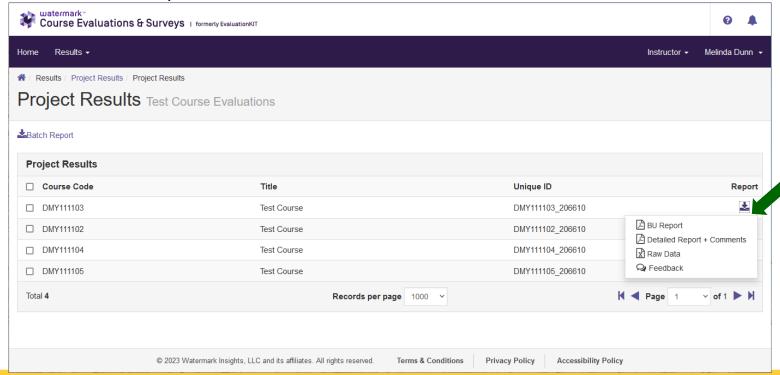

Once the course evaluation period has ended and reports are available, you can view results for each course by selecting Results > Project Results from the menu bar. Then select the project name (e.g., Fall 2023 Course Evaluations) to view results for courses in the project.

Viewing Evaluation Results

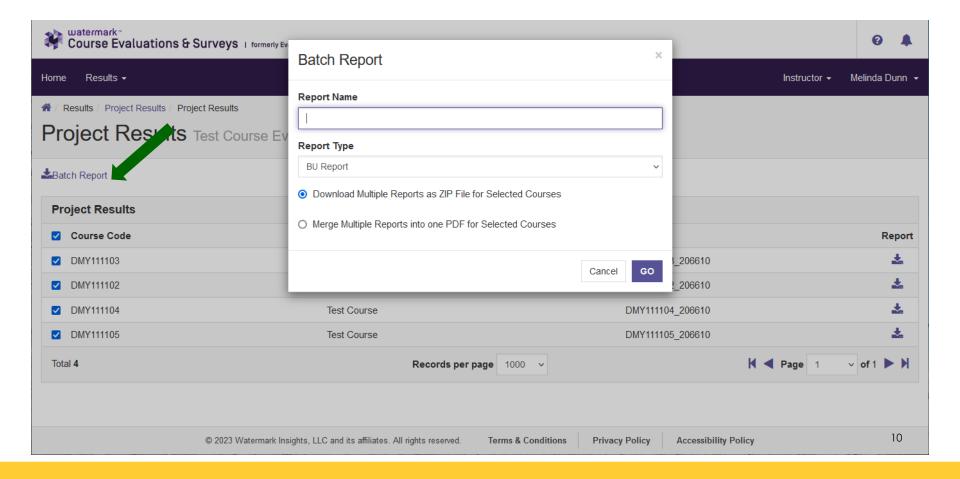

- From here, you can choose between three different formats for results:
 - BU Report: a PDF report with results from the course with the comparison group and comments for free-text items (comments for Likert items are not included).
 - Detailed Report + Comments: a PDF report with results from the course with the comparison group and comments for both Likert items and free-text responses.
 - RAW DATA: an Excel spreadsheet with one record for each response (no identifying information is included), which you can use to match open-ended comments with evaluation responses

Viewing Evaluation Results

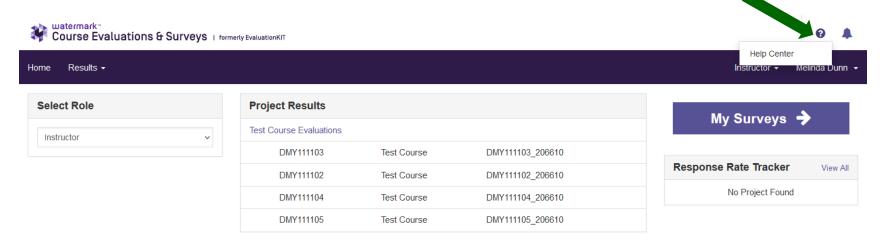

• If you have multiple courses in a project, you can select a group of courses and generate a Batch Report. This produces either one PDF file containing individual course reports or multiple PDF files, one for each course, in a ZIP file. You can choose to include or exclude the written comments.

Questions?

 Tutorials for accessing results and building reports are provided by EvaluationKit in the Help Center.

Questions?

If you have any questions about accessing electronic course evaluations, please contact:
